National Security Personnel System:

Will provide DoD with a modern, flexible and agile human resources system, more responsive to the national security environment, while preserving employee protections and benefits.

Will allow DoD to manage strategically its civilian workforce based on a total force perspective.

Will enable DoD to hire more quickly, offer competitive salaries and compensate and reward our employees based on their performance and contribution to our mission.

Has been a broad based, participative process involving hundreds of DoD employees, managers, supervisors, our labor partners and other key stakeholders.
